DROOM DAZLEAN

Scope of the Academix School ERP

The School ERP system is designed to streamline administrative, academic, and operational tasks. It provides a centralized platform for managing students, teachers, staff, finances, and resources.

The following modules are incorporated in our system.

Module	Features	Notes
Student Management	Admissions, Attendance, Academic Records, Disciplinary Issues Tracking	Automates student-related processes like admissions and attendance tracking while ensuring secure storage of academic records.
Teacher Management	Class Assignments, Notifications, Performance Appraisal	Simplifies class scheduling for teachers, facilitates communication with students and parents, and tracks teacher performance metrics.
Fee & Finance Management	Fee Collection, Payroll Processing, Financial Reporting	School fee collections with online payment options, automates payroll processing, and provides financial insights for better decision-making.
Examination Management	Exam Scheduling, Results Generation, Performance Analysis	Reduces the complexity of exam planning by automating result generation and providing detailed performance analytics for students.
Library Management	Book Inventory, Borrowed Books Tracking	Tracks library resources efficiently, ensures smooth borrowing/returning processes, and provides search functionalities for books and journals.

Module	Features	Notes
Human Resource Management (HRM)	Recruitment, Leave Management, Payroll	Manages staff recruitment processes, tracks attendance and leave requests, and ensures seamless payroll processing.
Timetable Management	Schedule Creation & Updates	Automates timetable creation for classes and teachers while ensuring no conflicts in scheduling or resource allocation.
Transport Management	Route Planning, Fleet Management	Optimizes transport routes for buses and tracks vehicle maintenance records to ensure safety and efficiency.
Communication Portal	Notifications, Announcements	Facilitates communication between students, teachers, parents, and administrators through instant notifications and announcements.
Event Management	Event Scheduling & Participant Tracking	Organizes school events like sports days or cultural programs while tracking participant details efficiently.
Homework & Assignment Management	Assignment Uploads by Teachers	Allows teachers to upload assignments online while enabling students to submit their work digitally within deadlines.

Pricing Structure

To best suit your institution's financial and operational preferences, our School ERP system is available under two distinct pricing models, which you must select: Subscription-Based Pricing and Perpetual Licensing. Both options provide a comprehensive suite of tools to streamline school management, but they differ in payment structure and long-term benefits. Please review the details below to determine which model aligns best with your school's needs.

1. Subscription-Based Pricing

This method involves paying a recurring fee monthly for access to the ERP system. It is ideal for schools that prefer affordability and flexibility without the need for a once-off upfront investment.

Features:

- Payment is made monthly, making it easier to manage cash flow.
- Includes software updates, maintenance, and customer support.
- Scalable pricing based on the number of students and modules used.

Benefits:

- Low upfront costs make it accessible for schools of all sizes.
- Flexibility to scale up or down as the institution grows or changes.
- Always access the latest version of the software without additional upgrade fees.

Pricing:

- \$2 USD per student monthly subscription.
- \$200 USD per module per.

2. Perpetual Licensing

This model involves a one-time upfront payment for the software license, with additional costs for ongoing support, maintenance, and upgrades. It is best suited for institutions that prefer owning the software outright.

Features:

- A one-time purchase gives lifetime ownership of the software.
- Requires an annual maintenance contract (AMC) for updates and support.
- Often hosted on-premise, giving the school full control over data security and customization.

Benefits:

- Long-term cost savings compared to subscription-based models.
- Greater control over customization and hosting options.
- No recurring subscription fees after the initial purchase.

Pricing:

- \$3 500 USD upfront for full ERP system ownership.
- \$600 annually for AMC covering support and updates.

Additional Costs to Consider

Regardless of the pricing model chosen, some additional costs may apply:

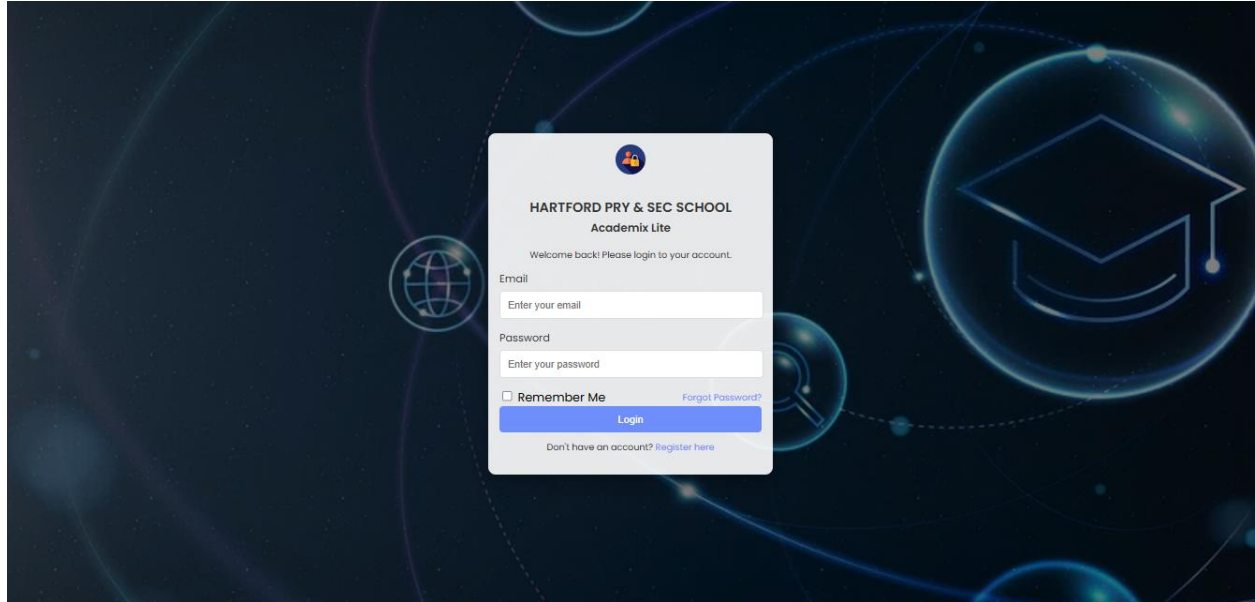

1. **Implementation Fees:** One-time setup cost; \$500.
2. **Hosting Charges:** Included in the charges above.

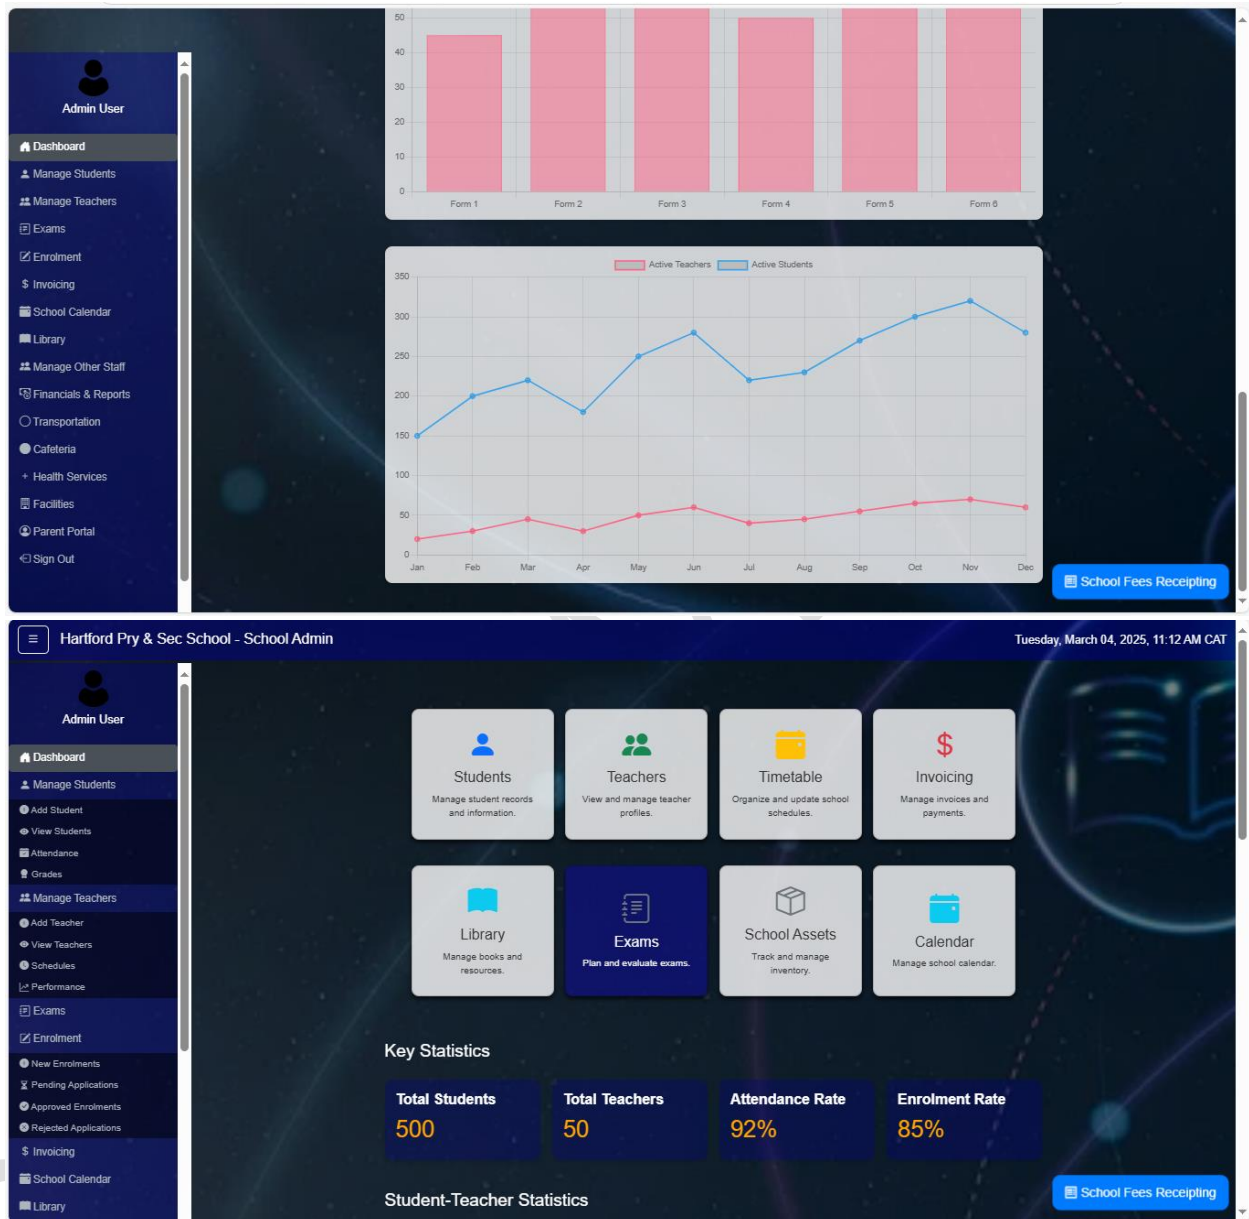

3. **SMS/Email Communication:** Recurring monthly expense based on usage volume (\$0.01–\$0.05 per message).
